

T8 D-Lux Series

The next game changer from the Silicon Valley could be over your head.

Luxul Technology's LED T8 D-Lux Series create a dimmable* solution for direct replacement of fluorescent lamps with virtually any existing magnetic or electronic ballast.

* Dimmable to 5% when interfaced with dimmable ballasts and switches.

The Broadest Portfolio On the Market

Luxul Technology is the only company in the world that offers dimmable UL® certified T5, T5HO, and T8 retrofit LED replacement tubes, supporting both electronic and magnetic ballasts. All three lines are available in six (6) different temperatures, as well as six size options, ranging from 2ft. to 8 ft.

Recently, Luxul Technology became the first manufacturer to offer a dimmable U-shaped LED lamp (U-Lux), further ensuring that the most demanding lighting requirements can be met.

Unmatched American Quality and Craftsmanship

Backed by over fifty global patents, Luxul's T8 D-Lux Series feature an industry-best 300° beam angle that evenly distributes 115 lumens per watt with no scalloping, and can be programmed with both customizable and rapid-start speeds. With tight LED binning and constructed using the most chips per foot, Luxul's T8 D-Lux Series bring about a robust, consistent illumination expected from the craftsmanship of American workers.

A Plug and Play, Cost Saving Solution from Day One

Luxul's T8 D-Lux Series are a direct plug and play solution. The end user will enjoy a cost savings from the time of installation, as anyone can complete the job. Simply turn off the power to your fixture, remove the old tube, install the new Luxul tube, and turn the power back on. It's that simple! Luxul's T8 D-Lux Series are an ideal upgrade progression for department stores, supermarkets, commercial office space, car dealerships, municipal buildings, and so much more. For an easy-to-follow diagram, see the reverse side of this sheet.

Eco-Friendly, Certified, and Efficient

Luxul's T8 D-Lux Series are constructed from hazardous-free materials that are 100% recyclable. Luxul's T8 D-Lux Series are Title 24 compliant, and have been approved by the DLC, UL, CE, and RoHS, in addition to having achieved the U.S. Department of Energy's LED Lighting Facts certification. Along with being a safer solution, Luxul's T8 D-Lux Series operates with an unequalled efficiency, creating an instant return on investment by knocking 40% or more* off of energy consumption from a fixture.

Backed By the Strongest Warranty Today

Every Luxul T8 D-Lux Series is backed by a 5-year/50,000 hour guarantee, ensuring peace of mind and providing satisfaction for years to come.
